Quarterly Activities and Cashflow Report

Highlights:

- **Resource modelling underway**
- **Company evaluating a number of value-accretive acquisition opportunities**
- **Focus on preserving cash and minimising expenses**

The previous quarter has been a relatively quiet period for Gateway Mining Ltd ('Gateway' or 'the Company') primarily due to ongoing difficult market conditions for junior resource companies.

In the Company's opinion, operating conditions are not appropriate for undertaking large exploration programs. In saying this, the Company remains extremely positive about the quality of the Gidgee project and its potential for a significant discovery.

Resource Modelling Underway

The Company has engaged external consultants to undertake estimation of a JORC compliant resource on the gold-related drilling at Gidgee. It is expected this will be released to the market in the current quarter.

While the focus of drilling over the last two years has been the Volcanogenic Massive Sulphide (VMS) targets within the Gidgee ground, the Company has continued to steadily advance the gold targets where we now believe we have a very strong understanding of the geology. It is expected this will allow for much more targeted drilling along the contact zone between the Montague granodiorite intrusion and the basalt rocks. Within this zone, the Company believes there is substantial Reduced Intrusive Related (RIR) gold mineralisation.

Future exploration programs are designed specifically to target these interpreted zones. The Company will provide updates on the commencement of future drill programs when it is in a position to do so.

Value accretive acquisition opportunities

The Company has been evaluating a number of complementary acquisitions to its Gidgee project, as well as other resource-related opportunities. While market conditions remain exceedingly difficult for the

junior end of the resources sector, the Company views this period as an opportunity to secure quality projects at the 'bottom of the cycle'. There are a number of opportunities within Australia, as well as overseas, that the Company views as very strong value-enhancing options for Gateway over the medium-long term.

The Company is in various stages of negotiations with a number of parties regarding acquisition opportunities.

None of the opportunities or negotiations have yet reached a point where there is enough certainty to make an announcement to the market. Should the Board decide to proceed with any further opportunities, the market will be promptly informed and shareholder approval sought, if required.

Focus on preserving cash

As always, the Company maintains a very disciplined approach to managing its cash balance. This is particularly important given the current market conditions.

The Company recently moved offices to Level 11, 52 Phillip St Sydney, NSW. The company does not pay any rent for these premises because it is absorbed through other business the directors are involved with.

Further, while the directors have accrued fees owing during the last quarter, no cash payments were made to any directors (as evidenced in item 1.23 of the Cash Flow Statement below) in order to preserve the Company's cash balance.

The Board hopes this, along with other money-saving initiatives, demonstrates its commitment to advancing its Gidgee project, and adding any worthwhile projects to its portfolio should acceptable terms be negotiated, even during these difficult times.

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Scott Jarvis, a full time employee & Head Geologist at Gateway Mining, a member of the Australian Institute of Geoscientists. Mr Scott Jarvis has a minimum of 5 years' experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Scott Jarvis consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
